Sustainable Seas Ltd	Barbados	110,000	100%	1	Govt of Barbados (CZMU)	IADB	Jan 2018 to Sept 2018	N/A

Detailed description of project

The general objective of the consultancy is to establish the strategic direction of the CZMU and to formulate a ten year SAP for integrated coastal zone management which incorporates its current and new priorities that may be identified from the studies which are being conducted under Component 1 of this Program (including DRM and CCA), and includes goals and objectives, expected outcomes, and a detailed roadmap for enabling the CZMU and its strategic partners to take the identified actions.

The approach to the consultancy was to assess the current situation on coastal vulnerability and risk in Barbados due to geologic and climatic hazards, including that related to the impacts of climate change; and the technological hazards associated with oil spills. The work also needed to identify guidelines, policies, legal instruments and institutional frameworks that are presently in place, which fall under the ambit of the CZMU and key strategic partners, to address and/or reduce vulnerability due to natural disasters, climate change and oil spills, the measures should include those related to risk identification, prevention and mitigation, financial risk management, governance and preparedness and response and recovery. Finally, the consultancy seeks to identify gaps and challenges in the current practice that facilitate the effective mainstreaming of DRM and CCA in ICZM;

Type of services provided

Jonathan McCue (on behalf of SSL) was employed to submit the following services and deliverables the approval of the CZMU and PET:

- An Inception report
- A Baseline Report that presents the current situation on coastal vulnerability and risk in Barbados, and the policies and measures planned or in place to address them.
- Draft SAP for DRM and CCA in the coastal zone, detailing strategic adaptation actions and associated implementation plan
- Draft Final SAP for DRM and CCA in the coastal zone incorporating the comments of stakeholders shall .
- Final SAP for DRM and CCA in the coastal zone.
